"Arctoboreal Bioclimate Map" by Salvador Rivas-Martínez &

The "Arctoboreal Bioclimate Map" is a new computerized circumartic and circumboreal bioclimatic map of the Holarctic kingdom, that point out the bioclimates, ombrotypes, thermotypes and continentality of all this territory. It works well and show a high relationship with boreal and arctic vegetation and biogeocoenoses units of Alaska, Canada, Europe and Siberia.
